

# Every Call You Miss Is a Job Your Competitor Just Won

Voco is an AI-powered receptionist built for home service businesses. It answers every call 24/7, triages urgency, books appointments on the spot, and sends you instant alerts for emergencies — so you never lose a lead to voicemail again.

|                              |                                         |                                               |                            |

## The Problem

Home service contractors lose thousands of dollars each month to missed calls. When you're on a job site, driving between appointments, or off the clock, every unanswered call is a potential customer who calls your competitor instead. Voicemail doesn't cut it — 67% of callers hang up without leaving a message.

Hiring a full-time receptionist costs \$35,000–\$50,000/year and still doesn't cover nights or weekends. Generic answering services take messages but can't book jobs or assess urgency. You need someone who understands your trade, knows your customers, speaks your customer's language, and closes appointments — not just takes notes.

## The Voco Solution

Voco is your AI receptionist that answers, qualifies, and books — all in one phone call. It's not a chatbot, not a message-taker. It's a booking machine that works 24/7 — and if you'd rather answer yourself when you can, Voco rings your phone first and steps in only when you don't pick up.

## **AI Call Answering, 24/7**

Every call is answered instantly — nights, weekends, holidays. Your AI receptionist greets callers with your business name, answers questions about your services, and keeps the conversation natural and professional. Choose the voice and tone that fit your brand.

## **Smart Urgency Triage**

Voco instantly classifies every call: Emergency (gas leaks, floods, no heat), High-Value (water heater installs, full rewires), or Routine (quotes, maintenance). Emergencies trigger instant SMS alerts to your phone.

## **Books Appointments on the Spot**

The AI checks your real-time calendar availability and offers callers open time slots. When they pick one, it's locked into your Google or Outlook calendar immediately — double-booking is impossible. No phone tag. No callbacks. The job is booked before you even know about the call.

## **Knows Your Repeat Customers**

Connect Jobber or Xero and Voco recognizes who's calling: past jobs, last visit, even outstanding invoices. Repeat callers are greeted like the regulars they are, and every call attaches to the right customer record instead of creating a duplicate.

## **Validated Service Addresses**

Every address a caller gives is checked against Google's address database and read back for confirmation before booking — so your crew never drives to a street that doesn't exist.

## **Your Phone First, AI as Backup**

Prefer to answer when you can? Set a forwarding schedule and Voco rings up to five of your phones at once. If nobody picks up, the AI takes over seamlessly — the caller never hits voicemail.

## **Instant Emergency Alerts**

For urgent calls, you receive an SMS within seconds with the caller's name, number, job type, and urgency level. Be the first contractor on site, not the fastest to call back.

## **Multi-Language Support**

Voco auto-detects whether your caller speaks English or Spanish and responds in their language — even mid-call. No frustrated hang-ups. No lost jobs from language barriers.

## Recovery SMS

If a caller hangs up without booking, they automatically receive a text message follow-up tuned to their urgency. No lead left behind.

## Your Command Center

Every call, customer, and appointment flows into a single dashboard purpose-built for tradespeople. No training required — if you can use a phone, you can use Voco.

## Live Dashboard

See today's calls answered, pending callbacks, upcoming appointments, weekly stats, and a live activity feed — all at a glance, updating in real time.

## Customers & Jobs (CRM)

Every caller becomes a customer automatically. Jobs move through your pipeline — New, Booked, Completed, Paid — on a drag-and-drop board, while unbooked callers land in a Callbacks queue so nothing slips. View call recordings, transcripts, and urgency for every interaction, and create invoices and estimates without leaving the dashboard.

## Calendar & Scheduling

A visual weekly calendar showing all booked appointments color-coded by urgency. Syncs in real time with Google Calendar and Outlook. Travel time between service zones is automatically accounted for — no double-booking, no scheduling conflicts.

## Call Logs & Recordings

Complete history of every call: duration, booking outcome, urgency, language detected, and whether a recovery SMS was sent. Listen back to any call recording. Filter by urgency, outcome, date, or phone number.

## Analytics & Reporting

Track call volume trends, booking conversion rates, urgency breakdown, and pipeline status over time. Know exactly how your AI receptionist is performing and how much revenue it's driving.

# Fully Customizable to Your Business

Voco molds to the way you work, not the other way around.

- Define your own service list with urgency tags and custom intake questions per service
- Set working hours, appointment slot duration, and a call-forwarding schedule
- Connect Google Calendar, Outlook Calendar, or both
- Connect Jobber or Xero so the AI knows your customers and their balances
- Create service zones with travel buffers between areas
- Configure escalation contacts for emergency alerts
- Choose your AI's voice and tone: Professional, Friendly, or Local Expert
- Make a test call to hear your AI before going live

# What Contractors Are Saying

“Before Voco, I was losing 3–4 calls every weekend. Now my phone's booked Monday before I've had coffee.”

— Mike R., HVAC Contractor, Phoenix AZ

“Setup took 4 minutes. I heard my AI answer a call with my business name before I even finished my first cup.”

— Sandra T., Plumbing Company Owner, Austin TX

“One emergency booking at 2 AM paid for three months of Voco. I don't know why I waited so long.”

— Carlos M., Electrician, Miami FL

# Simple, Transparent Pricing

No setup fees. No hidden charges. Every plan includes the full AI receptionist, CRM, calendar sync, triage, notifications, integrations, and multi-language support — you only choose how many calls you need.

14-day free trial on all plans. Save 20% with annual billing. Cancel anytime.

Enterprise pricing available for franchises and multi-location businesses — unlimited calls, dedicated account manager, and custom integrations.

# Get Started in 4 Minutes

## 1. Set up your profile

Enter your business name, pick your trade, and choose your AI's voice and tone.

## 2. Confirm your services

Your service list auto-populates for your trade — HVAC, plumbing, electrical, and more. Adjust urgency tags and intake questions.

## 3. Add your contact details

Tell Voco where alerts should go. Verify your phone, and you're ready for emergencies.

## 4. Start your trial

Your dedicated AI phone number is provisioned instantly. Connect your calendar, make a test call from the dashboard, and you're live.

## Why Voco vs. The Alternatives

|                      | Voco      | Voicemail | Answering Service | Full-Time Receptionist |
|----------------------|-----------|-----------|-------------------|------------------------|
| Answers 24/7         | ✓         | ✓         | ✓                 | —                      |
| Books appointments   | ✓         | —         | —                 | ✓                      |
| Triages urgency      | ✓         | —         | —                 | Varies                 |
| Calendar sync        | ✓         | —         | —                 | Manual                 |
| Knows your customers | ✓         | —         | —                 | Eventually             |
| Multi-language       | ✓         | —         | Extra cost        | If bilingual           |
| Cost/month           | From \$99 | Free      | \$300–800         | \$3,000+               |
