Every Call You Miss Is a Job Your Competitor Just Won

Voco is an AI-powered receptionist built for home service businesses. It answers every call 24/7, triages urgency, books appointments on the spot, and sends you instant alerts for emergencies — so you never lose a lead to voicemail again.

24/7	100%	< 1 sec	4 min

The Problem

Home service contractors lose thousands of dollars each month to missed calls. When you're on a job site, driving between appointments, or off the clock, every unanswered call is a potential customer who calls your competitor instead. Voicemail doesn't cut it — 67% of callers hang up without leaving a message.

Hiring a full-time receptionist costs $35,000–$50,000/year and still doesn't cover nights or weekends. Generic answering services take messages but can't book jobs or assess urgency. You need someone who understands your trade, speaks your customer's language, and closes appointments — not just takes notes.

The Voco Solution

Voco is your AI receptionist that answers, qualifies, and books — all in one phone call. It's not a chatbot, not a message-taker. It's a booking machine that works 24/7.

AI Call Answering, 24/7

Every call is answered instantly — nights, weekends, holidays. Your AI receptionist greets callers with your business name, answers questions about your services, and keeps the conversation natural and professional.

Smart Urgency Triage

Voco instantly classifies every call: Emergency (gas leaks, floods, no heat), High-Value (water heater installs, full rewires), or Routine (quotes, maintenance). Emergencies trigger instant SMS alerts to your phone.

Books Appointments on the Spot

The AI checks your real-time calendar availability and offers callers 2–3 open time slots. When they pick one, it's locked into your Google or Outlook calendar immediately. No phone tag. No callbacks. The job is booked before you even know about the call.

Instant Emergency Alerts

For urgent calls, you receive an SMS within seconds with the caller's name, number, job type, and urgency level. Be the first contractor on site, not the fastest to call back.

Multi-Language Support

Voco auto-detects whether your caller speaks English or Spanish and responds in their language. No frustrated hang-ups. No lost jobs from language barriers.

Recovery SMS

If a time slot fills while the AI is on a call, the caller automatically receives a text message with alternative available times and a booking link. No lead left behind.

Your Command Center

Every call, lead, and appointment flows into a single dashboard purpose-built for tradespeople. No training required — if you can use a phone, you can use Voco.

Live Dashboard

See today's calls answered, pending leads, upcoming appointments, weekly stats, and a live activity feed — all at a glance.

Lead Management (CRM)

Every caller becomes a lead automatically. Track them through your pipeline: New → Booked → Completed → Paid. View call recordings, transcripts, and urgency classification. Switch between list and Kanban board views. Filter by status, urgency, date, or search by phone number.

Calendar & Scheduling

A visual weekly calendar showing all booked appointments color-coded by urgency. Syncs in real time with Google Calendar and Outlook. Travel time between service zones is automatically accounted for — no double-booking, no scheduling conflicts.

Call Logs & Recordings

Complete history of every call: duration, booking outcome, urgency, language detected, and whether a recovery SMS was sent. Listen back to any call recording. Filter by urgency, outcome, date, or phone number.

Analytics & Reporting

Track call volume trends, booking conversion rates, urgency breakdown, and lead pipeline status over time. Know exactly how your AI receptionist is performing and how much revenue it's driving.

Fully Customizable to Your Business

Voco molds to the way you work, not the other way around.

- Define your own service list with urgency tags (Emergency, High-Value, Routine)
- Set working hours, lunch breaks, and appointment slot duration
- Connect Google Calendar, Outlook Calendar, or both
- Create service zones with travel buffers between areas
- Configure escalation contacts for emergency call transfers
- Choose your AI's tone: Professional, Friendly, or Local Expert

- Make a test call to hear your AI before going live

What Contractors Are Saying

“Before Voco, I was losing 3–4 calls every weekend. Now my phone's booked Monday before I've had coffee.”

— Mike R., HVAC Contractor, Phoenix AZ

“Setup took 4 minutes. I heard my AI answer a call with my business name before I even finished my first cup.”

— Sandra T., Plumbing Company Owner, Austin TX

“One emergency booking at 2 AM paid for three months of Voco. I don't know why I waited so long.”

— Carlos M., Electrician, Miami FL

Simple, Transparent Pricing

No per-call charges. No hidden fees. Every plan includes the full AI receptionist, CRM, calendar sync, triage, notifications, and multi-language support.

	Starter	Growth	Scale

Enterprise pricing available for franchises and multi-location businesses. Includes unlimited calls, dedicated account manager, and custom integrations.

Get Started in 4 Minutes

1. Choose your trade

Select HVAC, Plumbing, Electrical, or General Contracting. Your service list auto-populates.

2. Set up your profile

Enter your business name, customize services, and set your working hours.

3. Connect your calendar

Link Google Calendar, Outlook, or both. Your AI will only book open slots.

4. Make a test call

Call your new AI number and hear it answer with your business name. You're live.

Why Voco vs. The Alternatives

	Voco	Voicemail	Answering Service	Full-Time Receptionist
Answers 24/7	✓	✓	✓	✗
Books appointments	✓	✗	✗	✓
Triages urgency	✓	✗	✗	Varies
Calendar sync	✓	✗	✗	Manual
Multi-language	✓	✗	Extra cost	If bilingual
Cost/month	From $99	Free	$300–800	$3,000+
